

# BERGER roÿale

offering consumers  
the **BEST OF BOTH  
WORLDS**

For centuries, oil-based enamel was the professional painter's only choice for painting and trimming wood and metal. In spite of the additional benefits provided by water-based emulsions, professional painters remained loyal to oil-based enamels for their smoother, harder and abrasion-resistant finish. Today **Berger Paints** challenges the status quo of the oil paint landscape, with the launch of eco-friendly **Berger roÿale Water-Based Luxury Gloss Enamel** and **Berger grip&seal high-performance Multi-Surface primer/sealer**; specially formulated for interior wood and metal.

Comparable on all performance parameters to oil-based enamel, **Berger roÿale Water-Based Luxury Gloss Enamel** offers consumers benefits not found in oil-based equivalents. Its impeccable smooth gloss and tough flexible finish, make it a truly innovative product in the premium interior enamel segment. When used in conjunction with **Berger grip&seal**, **Berger roÿale Water-Based Luxury Gloss Enamel** is the ideal interior paint solution for protecting wood, and providing wear and rust resistance to metal; a performance designed to wow even die-hard oil-paint fans.

This environment-friendly, water-based painting system allows for faster re-use of occupied living spaces. **Berger roÿale Water-Based Luxury Gloss Enamel** is available in standard White, Pastel, Deep and Accent bases, making hundreds of colour choices available to consumers, and is packaged in convenient quart, 1-gallon and 5-gallon pails.
